ABSTRACT

The second in a series of annual reports on enrollment in the California Community Colleges (CCC's), this document provides tables and graphs describing CCC enrollment for the 1993-94 academic year using student data from the Chancellor's Office Management Information System. The first section provides a summary of statewide enrollment and full-time equivalency students (FTES), including data on total enrollment and FTES for 1990-95 and trends in headcount and credit/non-credit enrollment for 1970-95. Section 2 provides statewide summaries of fall enrollments for 1993-94 examined by workload (i.e., full-time, part-time, and non-credit), age, gender, ethnicity (i.e., American Indian, Asian/Pacific Islander, Black, Filipino, Hispanic, and White), enrollment status (i.e., first-time, returning, continuing, transfer, and returning transfer students), and current level of educational attainment (i.e., freshman, sophomore, associate degree, baccalaureate degree, and special admission of a K-12 student). Section 3 presents fall and spring enrollments by college for 1993-94, while section 4 examines fall 1994 enrollments by college for the following student characteristics: workload, ethnicity, gender, age, enrollment status, and current level of educational attainment. An appendix provides definitions of variables used in the study. (MAB)

Preface

This is the second in a series of annual reports on California community colleges enrollment, covering the years 1993 and 1994. Those wishing to review prior trends should refer to the first report in this series, **Report on Enrollment 1990-1993**, issued last year. Both reports are presented in almost the same format, including student demographics and academic status. The only changes are the addition of district totals for multi-campus districts and the addition of percentage distributions of students by characteristics. Additional background on community college enrollment is contained in the Chancellor's Office **15-Year Enrollment Forecast**, issued each December. In addition, the office has underway an analysis of community college **Enrollment Trends** over the past two decades which will be issued early in 1996.

Data for this report were taken from the student file of the Chancellor's Office Management Information System (MIS). Apart from the imputation of some missing data, tables in this report represent the contents of the student file as of October 1, 1995. Data submitted by community college districts after that time are not reflected here.

A report of this magnitude relies upon the work of community college district personnel who submit unit record data on more than 1.3 million students each term. Our appreciation is extended not only to those individuals, but also to staff in the Chancellor's Office MIS division who provided the basic work files from which this report was prepared.

This report is designed for those individuals at the state and local levels who use data on community college students for planning and analytical purposes. We welcome your comments and suggestions on ways in which the data may be more usefully displayed. These and questions regarding the data may be directed to the Research and Analysis Unit by phone at (916) 322-4656, FAX at (916) 327-5889, or by E-Mail at CCHAN@CC1.CCCCO.EDU.
